The time has come for all of us to join together and preserve Montclair's architectural heritage.

The C.H. Huestis House, located at # 4 Duryea Road, was built in 1888 and is on the New Jersey Register of Historic Places (ID#1137). It is described as "the earliest and most distinguished example of shingle style architecture in Upper Montclair".

The house was purchased by a developer who recently met with some of the residents of Duryea Road and explained plans to demolish the building, subdivide the lot, and build new housing on the site.

Given the architectural significance of the C.H. Huestis House, we the undersigned respectfully request that the developer reconsider and preserve this historic Montclair building at #4 Duryea Road for generations to come.

The undersigned also request that the Historic Preservation Commission, the Planning Board, and the Town Council act quickly and nominate # 4 Duryea Road for historic preservation protection.
